

HIGH SCHOOL PHYSICS RESEARCH CAMP

Presented by Saint Joseph's University' Physics Department

JUNE 19 TO JUNE 24, 2023

FREE TO ALL STUDENTS AND TEACHERS

Completing physics research is the absolute best way to prepare high school students for further study in physics. However, starting a research program at the high school level can be challenging.

SJU is presenting a **week-long physics research camp** this summer to help both students and teachers to learn the basics of physics research together:

- Students and teachers will **complete original research** in an actual SJU physics lab.
- Students will **defend their research** in a mini dissertation type format.
- Teachers will leave with **concrete steps to start a program** of their own.

This camp is FREE! ALL costs, including housing and meals, are covered, thanks also to the Meggers grant from American Institute of Physics. Additional money to defray travel costs may also be available. Teachers will receive an additional compensation of \$500.

SAINT JOSEPH'S UNIVERSITY
UNIVERSITY CITY CAMPUS
600 S 43RD STREET,
PHILADELPHIA, PA
